

DEVENDRA AGNIHOTRI

Staff iOS Engineer • React Native Developer

+91 85058 23517 • devendra.bhumca12@gmail.com • Noida, India (Ready for Relocation)

Portfolio: devendrabbhumca12.github.io • **LinkedIn:** linkedin.com/in/devendra-agnihotri-5b0617a8

PROFESSIONAL SUMMARY

Staff iOS Engineer with 11+ years building production applications for enterprise banking, IoT, and consumer products. Expert in Swift, SwiftUI, Modern Concurrency and iOS architecture patterns. Led teams of 5+ iOS engineers, shipped 15+ App Store products for global brands, and mentored engineers to senior roles. Strong focus on scalable architecture, concurrency, and building teams that care about code quality.

TECHNICAL SKILLS

Languages & Platforms: Swift • Objective-C • TypeScript • JavaScript • iOS

iOS Frameworks: SwiftUI • UIKit • SwiftData • Core Data • Combine • NaturalLanguage • Apple Foundation Models • CoreBluetooth • Multipeer Framework

Concurrency & Performance: Swift Concurrency • async/await • Actors • GCD • Memory Profiling • Performance Optimization (Time Profiler, Allocations, Leaks) • Security (Keychain, SSL Pinning) • Structured Concurrency • Cryptokit • AES Encryption

Architecture & Design: Clean Architecture • MVVM/MVVM-C • Coordinator Pattern • Dependency Injection • Protocol-Oriented Programming • Modular Design • Composable Architecture

Cross-Platform & AI/ML: React Native • React Hooks • React Navigation • Semantic embeddings • Vision OCR • Semantic Search • On-Device Inference

Tools & Practices: Xcode • Swift Package Manager • CI/CD • XCTest • App Store Connect • Git • Agile/Scrum • API Design (REST, GraphQL) • Unit Testing • Git and GitHub

AI-Assisted Development: Cursor • GitHub Copilot • Claude • OpenAI tooling • MCP • prompt engineering • RAG systems

PROFESSIONAL EXPERIENCE

NAGARRO SOFTWARE

Staff Engineer, iOS • Noida, India • September 2021 – Present

- Established Clean Architecture and MVVM-C standards across enterprise projects, enabling independent feature teams.
- Managed Swift codebase of 500K+ lines across 15+ modules with 85% test coverage.
- Led migration of 10+ legacy modules from GCD to Swift Concurrency, eliminating threading crashes and data races.
- Designed reusable component library adopted by 5+ product teams across the organization, reducing feature delivery time by 35% for dependent teams.
- Managed 5+ iOS engineers on Swift best practices, Swift development, debugging and concurrency patterns.
- Built code review processes that maintained high code quality standards and reduced production defects.
- Integrated AI-assisted development tools with secure code review gates to maintain production quality.

ALTRAN (NOW CAPGEMINI ENGINEERING)

Senior Software Engineer, iOS • Gurugram, India • August 2019 – September 2021

- Refactored legacy view-controller-heavy modules to MVVM with dependency injection for improved testability.
- Implemented comprehensive testing strategy, improving test coverage from 42% to 80+% and reducing production defects by 65% and CI/CD integration for IKEA project.

VVDN TECHNOLOGIES

Senior Software Engineer, iOS • Noida, India • September 2017 – August 2019

- Owned end-to-end delivery of multiple iOS applications from requirements to App Store submission.
- App Store ratings of NETGEAR/ORBI app improved from 3.8 to 4.7 stars (24% increase) post-optimization
- Resolved production issues through debugging and performance profiling; Resolved 50+ production issues.

- Awarded Gems of the Year (2018-2019) for technical excellence.

MOBULOUS TECHNOLOGIES

Software Engineer, iOS • Noida, India • July 2015 – August 2017

- Delivered iOS applications for diverse clients from concept through App Store release.
- Integrated 10+ third-party SDKs (Payments, Analytics, Location) across 6 projects with zero integration issues
- Maintained and migrated projects from Objective-C to Swift across multiple applications.

SHIPPED APP STORE PRODUCTS

ENBD X (Emirates NBD) • [AppStore](#) • 4.7 Rating, 1M+ downloads.

Mobile banking super-app with accounts, cards, transfers, investments, and lending services. Engineered reusable Payments and Lending components.

NETGEAR Orbi • [AppStore](#) • 4.7 Rating, M+ downloads.

Mesh Wi-Fi management app. Designed device onboarding flow and implemented remote network management.

NETGEAR Nighthawk • [AppStore](#) • 4.7 Rating, 5M+ downloads.

Router companion app with parental controls and remote management capabilities.

IKEA Home Smart • [AppStore](#) • 4.6 Rating, 1M+ downloads.

Smart-home control for Tradfri ecosystem. Engineered integrations with Google Assistant, Alexa, and Sonos.

Wedding Vows • [AppStore](#) • 4+ Rating, 1M+ downloads

Guest-experience app with photo galleries, event details, and video reels. Shipped solo from architecture through release.

UKG Pro • [AppStore](#) • 4.5 Rating, 1M+ downloads.

Workforce management platform for scheduling, time tracking, and employee engagement.

Lufthansa CrewFeedback (Enterprise iOS Application) • In Development

Cabin crew collaboration platform for operational feedback and team communication.

CrewP2P Framework (Enterprise iOS Framework) • Other Apps are using this framework

Reusable offline peer-to-peer communication and data synchronization framework.

OPEN SOURCE PROJECTS

FindKeep • github.com/devendrabhumca12/findkeep

On-device natural-language search using Vision OCR and semantic embeddings. Fully offline with SwiftData persistence.

FormEasy • github.com/devendrabhumca12/formeasy

Offline-first document app for government and KYC uploads. On-device crop, resize, and format conversion. React Native.

MedsPlain • github.com/devendrabhumca12/medsplain

Medicine label scanner converting dosage text to plain-language instructions. Vision OCR and Apple Foundation Models.

ActionBrief • github.com/devendrabhumca12/actionbrief

Converts unstructured notes into structured checklists using Apple Foundation Models.

Open-Source SwiftUI Components • github.com/devendrabhumca12

Reusable libraries published for other iOS engineers: NetworkManager (reachability/connectivity detection), CustomAlertView framework.

AWARDS & RECOGNITION

- **Team Lead, Cursor Hackathon In Nagarro** – Led the team that shipped an event-companion app end to end, owning the full SDLC from concept to working release under competition deadline.
- **GitHub Copilot Hackathon In Nagarro** – Delivered a complete build through AI-assisted development, covering the full SDLC from requirement to demo.

EDUCATION

Master of Computer Applications (MCA) • Banaras Hindu University, Varanasi • 2012-2015

Bachelor of Science (B.Sc.) • CSJM University, Kanpur • 2008-2011
